Skills

The ability to deal with office programs excellently, such as Office software group :

- Text editing and management software .
(Microsoft Word)
- Spreadsheet creation and analysis software .
(Microsoft Excel)
- Presentation Creation Program .
(Microsoft PowerPoint)
- Email management and processing software .
(Microsoft Outlook)
- Database Creation and Management Program .
(Microsoft Access)

Create, handle and modify media, such as:

- Designing logos and advertising interfaces .
- Edit photos in Photoshop and make effects on them.
- Editing videos and making video introductions.
- Edit the audio and mix the different sounds.

Hussein Ali Abdul Sattar (Hussein Technologist)

Technical and technical in the world of computers and networks

Executive Summary

Hussain Technician is an expert in the field of computer and information technology, I have more than 11 years of experience in various aspects of computers, from software development to network management and cybersecurity.

I have strong skills in software development and application design, and I have the ability to understand customer needs and provide them with effective and innovative solutions.

I look forward to continuing the challenges of the technical field and contributing to the advancement of technology, while fully devoting myself to continuous learning and expanding its technical perceptions.

Education

Technical Diploma in Computer Systems Technologies

Southern Technical University / Technical Institute - Amara

Work Experience

Programming:

- Ability to program in C++ , Visual Basic and Python .
- Ability to understand and apply basic concepts of programming such as data structures and logical structures.
- Ability to solve problems using programming.
- Web design using HTML5, CSS3, JavaScript and PHP.
- Create and manage databases in the language of structured queries (SQL).

Computer Network Design:

- Ability to understand and apply basic concepts of computer networks such as printers, peripherals and network controllers.
- Ability to design and install computer networks.
- Ability to solve problems related to computer networks.

Computer Maintenance:

- The ability to diagnose and repair computer malfunctions.
- Ability to update and maintain computer programs.
- Ability to solve problems related to computer networks.

Work on cybersecurity:

- Ability to understand basic cybersecurity principles.
- Ability to identify and evaluate security vulnerabilities.
- The ability to apply cybersecurity measures to protect networks and computers.
